Usable Data

# Pana-Vue® Pana-Scan™ Picture & Business Card SCANNER

Great for  
**FUJIFILM**  
instax &  
Polaroid  
Prints

Now you can go through those shoeboxes of old pictures in the closet, scan them into your computer and print copies or send them to friends and family. Found a picture of the kids at their 5th birthday party? Scan it and send it to the grandchildren to show them how their parents looked at 5.

Old pictures fading? Scan them and add a new vibrancy to a new print with the Arcsoft MediaImpression software (PC and MAC) included.

A great way to add Instax, Holga, and Lomo pictures to Facebook and other social networking sites.

Make sure the whole family has their own copies of all the family memories.

Put the old picture into the scanner and out it comes as a digital image ready to email or print

And as an added feature, scan in that pile of business cards you collected over the years. The Arcsoft BizCard Scan OCR software for windows (included) reads the information on the business cards allowing you to save to Outlook or Excel for easy management.

**FUN, AND EASY TO USE, FOR THE WHOLE FAMILY**

## Technical Specifications:

• Scanner Type	Sheet-fed scanner single page
• Start-up time	Less than 7 seconds
• Memory card support	SD / SDHC up to 32GB / USB Flash Drive
• Controls	2 Button (Power / Custom)
