SIRUI P-S MULTI-FUNCTION PHOTO/VIDEO MONOPODS

WHERE SUPPORT MEETS FLEXIBILITY

**Photo Monopod, Video Monopod
and Table-Top Tripod
All In One Compact System**

**P-S
Series**

SIRUI's revolutionary New P-S Series Multi-Function Photo/Video Monopods have three sturdy fold-down support feet that provide stability and flexibility not possible with conventional monopods! The rugged feet allow you to pan the monopod 360° and tilt 20° in any direction without worrying that the monopod will move out of position. And you can step on the feet for even greater stability!

The SIRUI designed and patented 360° panning hand grip produces smooth, pro-level panning effects. It's foam padded for a comfortable feel and secure hold in cold or wet weather conditions. If you don't need the panning function, simply tighten the locking collar.

To tilt the monopod 20° in any direction, SIRUI utilizes a precision ball head mechanism in the base of the monopod. You can control the amount of drag that you need by turning the tension control knob. To lock the monopod in a vertical position, simply screw down the vertical locking collar and it will stand upright on its support feet*. The support feet can fold flush and lock into position against the monopod leg.

If you don't need the feet, you can easily unscrew them and convert the SIRUI P-S Photo/Video Monopod into a conventional monopod. When the feet are removed a large rubber foot lets you work on slippery surfaces and can be replaced with the included stainless steel spike for use outdoors. And for added flexibility, the feet can be used as a table-top or low angle tripod.

SIRUI P-S Series Photo/Video Monopods are equally at home with photo and video equipment. And if you need to get your equipment up high or want an unusual perspective, you can, thanks to the lightweight design! For video or still photography you can add the SIRUI VA-5 and VH-10 Video Heads, L-10 or any SIRUI BALL Head. For fast connect/disconnect, you can add the SIRUI MP-20 Photo or VH-90 VideoQuick Release Platforms.

* Not designed for use as a free-standing support.

Features:

Sirui P-S Series Monopod

1. Three sturdy fold-down support feet that provide additional stability and flexibility. Removable for use as a standard monopod.
2. Patented panning grip smoothly rotates 360°.
3. Swivels 20° in any direction or locks vertically (patented).
4. Adjustable friction control on the swivel ball lets you adjust tension for different weight equipment and resistance requirements
5. Patented base locking collar keeps the monopod standing upright.
6. Removable feet can be used as a table top tripod.
7. Foam grip for solid hold in wet or cold conditions.
8. Mounting plate comes with double headed, reversible screw that accommodates 1/4" and 3/8" tripod sockets.
9. Rubber foot for use on wooden, stone surfaces. Replace with spike for use outdoors in grass and dirt.
10. Lightweight 8 layer 100% Carbon Fiber for added strength, increased load capacity and vibration reduction.
