# SIRUI TY SERIES QUICK RELEASE PLATES, PLATFORMS, L-BRACKETS, BASES

## TY Series

All SIRUI TY Series Quick Release Plates are made from forged aluminum alloy. The forging technique produces high-density metals with much greater strength than die-cast methods. When using long lens or heavy cameras, it is very important to make sure that there is a perfect fit between the camera and quick release plate.

For that reason, SIRUI offers a selection of quick release plates for different types and models of cameras.

**Standard SIRUI TY Series** QR plates are designed with **slide-stopping rubber mats** to prevent the camera/lens from moving while tightening the screw. The new **SIRUI TY-X Series** plates have a **special slot for use with today's popular camera straps** – you don't need to remove the strap to attach the QR plate to the ball head.

All plates take advantage of the **patented SIRUI safety lock design**, that prevents your camera from accidentally sliding off of the head when you slightly loosen the Quick Release Clamp (to make adjustments to the positioning of your equipment). All SIRUI TY Series Quick Release Plates are Arca-compatible. Many SIRUI TY Quick Release plates have slide stopping rubber mats that are designed to prevent the camera from shifting or twisting as you move the ball head or position your camera in a vertical position. There is also a series of specialized QR plates that are camera model specific, for a perfect fit!
